BULLETIN

THE INSTITUTE OF PHYSICS

Officers and Members of the Board, 1956-1957

President :

O. W. HUMPHREYS, C.B.E., B.Sc., M.I.E.E., F.Inst.P.

Immediate Past Presidents :

C. SYKES, C.B.E., D.Sc., F.Inst.P., F.R.S.

SIR JOHN COCKCROFT, O.M., K.C.B., C.B.E., M.A., D.Sc., F.Inst.P., F.R.S.

Vice-Presidents :

G. R. NOAKES, M.A., F.Inst.P.

W. H. TAYLOR, M.A., D.Sc., F.Inst.P.

B. P. DUDDING, M.B.E., A.R.C.S., Ph.D., F.Inst.P.

PROF. E. A. OWEN, M.A., Sc.D., F.Inst.P.

Honorary Treasurer :

J. TAYLOR, M.B.E., D.Sc., F.R.I.C., F.Inst.P.

Honorary Secretary :

PROF. F. A. VICK, O.B.E., Ph.D., A.M.I.E.E., F.Inst.P.

Ordinary Members of the Board :

P. S. H. HENRY, B.A., Ph.D., F.Inst.P.

M. R. HOPKINS, M.Sc., Ph.D., F.Inst.P.

J. M. A. LENIHAN, M.Sc., Ph.D., A.M.I.E.E., F.Inst.P.

K. A. G. MENDELSSOHN, M.A., D.Phil., F.Inst.P., F.R.S.

A. T. PICKLES, O.B.E., M.A., F.Inst.P.

H. P. ROOKSBY, B.Sc., F.Inst.P.

L. R. G. TRELOAR, D.Sc., Ph.D., F.Inst.P.

G. W. WARREN, M.B.E., B.Sc., F.Inst.P.

Chairmen of Branches in Great Britain :

Liverpool and North Wales : PROF. E. A. OWEN, M.A., Sc.D., F.Inst.P.

London and Home Counties : J. S. FORREST, M.A., D.Sc., M.I.E.E., F.Inst.P.

Manchester and District : R. W. SILLARS, B.A., D.Phil., M.I.E.E., F.Inst.P.

Midland : PROF. P. B. MOON, M.Sc., Ph.D., F.Inst.P., F.R.S.

North-Eastern : PROF. W. E. CURTIS, D.Sc., A.R.C.S., F.Inst.P., F.R.S.

Scottish : J. M. A. LENIHAN, M.Sc., Ph.D., A.M.I.E.E., F.Inst.P.

South Wales : PROF. R. M. DAVIES, D.Sc., F.Inst.P.

Yorkshire : PROF. W. SUCKSMITH, D.Sc., F.Inst.P., F.R.S.

Nominated by the Physical Society :

H. H. HOPKINS, D.Sc., F.Inst.P. A. J. PHILPOT, C.B.E., M.A., B.Sc., F.Inst.P.

Secretary :

H. R. LANG, B.Sc., Ph.D., A.R.C.S., F.Inst.P.

Deputy Secretary :

N. CLARKE, B.Sc., F.Inst.P.

G.E.C.

xenon rectifiers

In certain applications, Xenon rectifiers are preferable to mercury rectifiers.

Advantages
1. Greater ambient operating temperature range (—55 to +70°c)
2. Shorter switching delay
3. Better storage properties

GXU3 This valve can be used as a replacement for such valves as the C.V.5. and G.U. 20/2I

FILAMENT		
Vf	4.0	V
If	11.0 (approx.)	A
RATING.	All values are absolute	
PIV	13 max.	kV
Ik (pk)	6 max.	A
Ik (av)	1.25 max.	A
Ik (surge)	60 max.	A

Also available are:—

GXU2 This valve is equivalent to the 4B32 and CV2518

FILAMENT		
Vf	5.0	V
If	7.1 (approx.)	A
RATING.	All values are absolute	
PIV	10 max.	kV

Ik (surge)	50 max.	A

GXU4 This valve is similar to the GXU 3, but has a 4V.7A heater.

Full particulars of these valves can be obtained from the G.E.C. VALVE & ELECTRONICS DEPT.

NOTE: A special feature of the GXU2, GXU3 and GXU4 valves is an enclosed anode design which results in an improved life.

THE GENERAL ELECTRIC CO. LTD., MAGNET HOUSE, KINGSWAY, W.C.2

Appointments Vacant

The inclusion of particulars of a vacancy must not be taken to imply that the Institute necessarily approves of the terms offered or that might be offered. Candidates should satisfy themselves that these are satisfactory, and they may always refer to the Institute for advice.

PHYSICIST required with honours degree in physics and preferably some experience in electronic industry to work on fundamental problems of digital computer research in New Laboratory Section of the manufacturers of "Hollerith" equipment. Attendance at professional meetings and the publication of results in scientific journals will be encouraged. The Company, of course, is well established in the field of office automation, and the post arises as a result of continued expansion of electronics development in the Company. Salary will be competitive; housing assistance can be given. Please apply to the Personnel Superintendent, The British Tabulating Machine Co. Ltd., Icknield Way, Letchworth, Herts. (Ref. I/496/I.)

PHYSICIST required by manufacturing group in London, to set up and lead small research department for investigating problems concerned with heat transfer and electro mechanical control systems. Practical engineering and/or research experience preferable. Please state age, experience and salary required to the Secretary, Biddle Holdings Ltd., 16 Upper Grosvenor Street, W.1.

THE HEATING AND VENTILATING RESEARCH COUNCIL requires investigators to study problems of measurement, instrumentation and automatic control in the heating and ventilation field. Applicants should be physicists or engineers of graduate or equivalent standard, and are required for Research Officer vacancies at the Leatherhead Laboratories, Surrey. This Council receives support from the Department of Scientific and Industrial Research. Excellent opportunities for advancement. Superannuation. Five-day week. First rate facilities. Salary to be negotiated. Write giving full details to: c/o Secretary, Messrs. Andrew W. Barr & Co., 9 Clarges Street, London, W.1.

A GRADUATE PHYSICIST and/or CHEMIST is required to take charge of a section of the Technical Service Department located in London, W.1. The work involves general properties of matter in relation to the use of all types of flexible film in the packaging and allied fields. Please write for application form to the Personnel Officer, British Cellophane Ltd., Bridgwater, Somerset, quoting ref. No. S561P.

Vacancies for

PHYSICISTS

THESE APPOINTMENTS CARRY SALARIES UP TO £1,450 p.a.

THERE ARE GOOD OPPORTUNITIES FOR MEN OF ABILITY TO ADVANCE TO POSITIONS CARRYING SALARIES OF THE ORDER OF £2,000 p.a.

A variety of research work in basic and applied physics is being carried out in our Research Department, and there are also vacancies for men interested in plant work as Instrument Managers. If you are interested and you hold a good honours degree, we shall be pleased to hear from you. Applications are invited from men with experience in research or industry, and also from those who have just completed their degree course. Where necessary appropriate training will be arranged by the company. Write, giving brief details of age, qualifications and experience, to The Staff Manager, Imperial Chemical Industries Ltd., Billingham Division, Billingham, Co. Durham, quoting reference b-w-4.

BRITISH PETROLEUM CO. LTD. has vacancies for geophysicists on its exploration staff. Candidates should have an honours degree in physics with subsidiary mathematics and/or geology, but candidates with a general degree will be considered. The work involves delineation of underground rock structure by seismic, gravitational and magnetic techniques and offers considerable scope for men with initiative who are prepared to travel and to work abroad. Normal leave is four months after two years' foreign service. When conditions permit, facilities are afforded for married men to have their families with them on foreign tours.
Basic salary is commensurate with age and experience, commencing at £1,075 for young, inexperienced graduates. Appropriate allowances are paid whilst on foreign service. Generous pension scheme.
Applications quoting F.107, should be addressed to Box 1442, c/o 191 Gresham House, E.C.2.

ALUMINIUM LABORATORIES LTD., Banbury, has vacancies for two Investigators in Applied Physics. Applicants, preferably under 30 years, should possess a good university degree or equivalent qualifications. The work includes the application of the theory of thermal transfer to production processes and investigation into problems connected with the development of non-destructive testing methods, in particular the study of the correlation of physical properties with mechanical properties of aluminium alloys. Pension and Life Assurance Scheme in operation.
Apply : Personnel Officer, Aluminium Laboratories Ltd., Banbury, Oxon.

PHYSICIST

The National Research Council of Canada has an immediate vacancy at their Ottawa laboratories for a Physicist or Chemical Physicist with a Ph.D. degree to collaborate in a small expanding group which is studying dielectric relaxation effects at all frequencies from d.c. to 300 kMc/s (1mm). The position offers a well-equipped laboratory with unusual freedom of work and publication. Initial salary up to $6,500 per annum depending on qualifications. Staff benefits include a superannuation plan, five-day week, and generous holidays and sick leave. Applications giving full details of education and experience, age, etc., should be sent to the Employment Officer, National Research Council, Sussex Drive, Ottawa 2, Canada. Please quote file AP101.

DEVELOPMENT ENGINEERS AND PHYSICISTS

Development Engineers and Physicists (senior and junior) are required by Louis Newmark Ltd., for its expanding laboratories at New Addington, Surrey. The work includes the design and development of electro mechanical devices used in aircraft control systems and covers all stages up to final installation and testing in aircraft. Experience of pressure capsule and servo following equipment an advantage. Applications from suitable ex R.A.F. technical personnel are welcomed. Pension scheme. Apply in writing giving full particulars to Personnel Officer, Louis Newmark Ltd., Prefect Works, Purley Way, Croydon.

PHYSICIST

for Research Department engaged on important applications of Physics to optical mechanical and electrical problems. Applicants should have an Honours Degree in Physics with good experience of Research procedure and aptitude for practical experiment. Applications, stating age, qualifications, and experience, should be addressed to The Managing Director, BARR & STROUD LTD., GLASGOW, W.3, quoting reference 197/T16.

Applications are invited for the following posts in the Instrument Technology Section, Physics Department, Imperial College, London, S.W.7 :
Lectureships — salary range £700 × 50 – £1,000 ; × 50 – £1,400.
Research Fellowships — salary range £700 × 50 – £1,000.
The latter may be appointed later to permanent staff. Full personal particulars and academic record to Professor of Instrument Technology.

COMMONWEALTH OF AUSTRALIA

Commonwealth Scientific and Industrial Research Organization

Division of Food Preservation and Transport

Appointment No. 300/188 of Physicist/Engineer
Applications are invited for appointment to a position of Physicist/Engineer in the Physics Section of the Division of Food Preservation and Transport located at Homebush, New South Wales.
The division has in progress a wide range of investigations of fundamental problems related to food and work on the technology of cold storage, freezing, canning and dehydration. The physics section undertakes a variety of long-term and short-term investigations related to the work of the division and many of these involve problems of heat and water transfer. The appointee will be asked to undertake investigations on the water loss from foods in cold storage and also to take part, from time to time, in short-term studies which will often be in collaboration with other sections of the division and to design special equipment required in the laboratory.
The appointee will be classified as Research Officer or Senior Research Officer and, according to qualifications and experience, commencing salary will be determined within the salary ranges of £A1,287 – £A1,912 p.a. (actual) or £A2,022 – £A2,297 p.a. (actual). Commencing salary for a female appointee would be £A160 p.a. less than the corresponding male figures.
Applicants should possess a University honours degree in Mechanical Engineering, Chemical Engineering or Science, with sound training in the principles of heat transfer, preferably including some research experience in this field.
First-class sea fares to Australia will be paid for the appointee, his wife and family.
The appointment will be conditional on a satisfactory medical examination and the successful applicant will be required to contribute to, and eligible to receive benefits from either the Commonwealth Superannuation Fund or the Commonwealth Provident Account.
Applications, referring to Appointment No. 300/188 and stating full name, place, date and year of birth, marital state, nationality, present employment, particulars of qualifications and experience and of war service if any, accompanied by copies of not more than four testimonials, and the names and addresses of at least two persons willing to act as referees should reach the undersigned, from whom additional information may be obtained, not later than January 31, 1957.

S. Shavitsky,
Chief Scientific Liaison Officer.

Australian Scientific Liaison Office,
Africa House,
Kingsway,
London, W.C.2.

SENIOR PHYSICIST

The South of Scotland Electricity Board require a Senior Physicist in connexion with the Board's Nuclear Power programme. The successful applicant will be on the Chief Engineer's Headquarters staff and will be required to assist in all matters relating to the Board's Nuclear Power Station programme. He will be required to represent the Chief Engineer at various committees and meetings with outside bodies. Applicants should have a degree in physics and preferably some experience in nuclear development.

The post is superannuable. The salary proposed is within the range of £1,675/£1,825. Applications should be made in writing to :

The Secretary
South of Scotland Electricity Board
P.O. Box 173
351 Sauchiehall Street, Glasgow, C.2

THE BRITISH CERAMIC RESEARCH ASSOCIATION invites applications from young men holding Higher National Certificates in Engineering, or Applied Physics or Chemistry for positions as Technical Officers. Good opportunities for advancement occur, both in the Research Association and the various clay industries—pottery, bricks, tiles, pipes and refractories—that it serves.
Apply in writing to the Director of Research, Dr. A. T. Green, The British Ceramic Research Association, Queens Road, Penkhull, Stoke-on-Trent.

THE BRITISH THOMSON-HOUSTON CO. LTD. has vacancies in its Research Laboratory at Rugby for physicists with 1st or 2nd class honours degree or A.Inst.P. There are vacancies for work on (1) Vacuum Physics, (2) Secondary Emission, and (3) Health Physics.
Applicants are invited to write to the Director of Research, BTH Co. Ltd., Rugby, giving particulars of age, qualifications, and experience, quoting reference WB.

UNIVERSITY OF SHEFFIELD

Two bursaries in the range of £300 – £400 per annum are available for students wishing to take a postgraduate degree in the Department of Fuel Technology and Chemical Engineering on research subjects connected with combustion of pulverized coal and the measurement of the total heat of coal samples. These bursaries are particularly suitable for a physicist or physical chemist wishing to enter the vitally important subject of fuel technology.
Applications should be sent to the Registrar by January 14, 1957.

G.E.C.

careers for physicists

The expanding interests of the G.E.C. are closely related to applications of the physical sciences. In consequence the Company's Research and Development activities at its Laboratories and Works offer attractive careers to physicists in a wide variety of interesting fields. There are many opportunities for direct employment ; in addition facilities are available for training.

For further information write to :

CONTROLLER, EDUCATION & PERSONNEL SERVICES
THE GENERAL ELECTRIC CO. LTD.
Magnet House, Kingsway, London, W.C.2

G.E.C.

A WORLD WIDE ORGANIZATION WITH 70,000 EMPLOYEES

CHIEF ENGINEER required, London area, to take charge of developing organization dealing with industrial electronic equipment, electronic components and printed circuits. This appointment demands an engineer with wide knowledge of industrial electronics; of manufacturing methods, both mass production and custom building ; and with exceptional drive and organizing ability. Age preferably 35 to 45. Applications should give very full particulars of education and experience and will be treated in strict confidence. Please send replies marked Private and Confidential to : T. H. Hardwicke, Esq., Assistant Personnel Superintendent, The Edison Swan Electric Co. Ltd., Cosmos Works, Brimsdown, Enfield, Middlesex.

UNIVERSITY COLLEGE OF RHODESIA

AND NYASALAND

Applications are invited for post of Demonstrator in Department of Physics. Appointment normally for three years.

Salary under consideration, but not less than £500 p.a. Superannuation scheme. Passages to Salisbury for appointee, wife and dependent children on appointment with allowance for transport of effects.

Detailed applications (six copies) naming three referees as soon as possible to Secretary, Inter-University Council for Higher Education Overseas, 29 Woburn Square, London, W.C.1, from whom further particulars may be obtained.

THE BRITISH CERAMIC RESEARCH ASSOCIATION, following an enlargement of its activities, has vacancies on its staff for first and second class honours graduates or equivalent qualifications in physics, chemistry and engineering. The salary offered is in accordance with qualifications and experience.

Scientists with higher degrees and research experience would be acceptable and paid on a higher scale. Undergraduates who intend to take their final degrees next year would also be considered. A number of vacancies exist for graduates with pass degrees.

The British Ceramic Research Association serves the whole of the clay industries—pottery, building bricks, tiles and pipes, refractories. (Good opportunities for advancement in these industries await suitable scientific and technical men.) It has newly built and equipped laboratories, and further extensions are planned. The F.S.S.U. Superannuation Scheme is in operation.

Applications and enquiries to the Director of Research, Dr. A. T. Green, The British Ceramic Research Association, Queens Road, Penkhull, Stoke-on-Trent.
